WHERE THE WILD THINGS ARE

An Untamed Summer Adventure
-2021-

Discover the incredible biodiversity of life on Planet Earth!

This summer, our fledgling zoologists will explore the wild and wonderful animal kingdom. This eight-week summer learning adventure will be full of Earth's many wonderful creatures and the environments they inhabit. Our young adventurers will explore the great animals of the forests, the awesome creatures deep within the oceans, the specialized inhabitants of the desert and tundra and our feathered friends of the sky.

From alligators to zebras, children will discover the wonders of wildlife through science, geography, art, cooking, stories, music, games, and activities. They will buzz with excitement as they meet furry, feathery, scaly, and slithery visitors!

Come for all 8 weeks of summer fun or pick and choose a few
